Re: Submittal of the North Boeing Interim Action Work Plan for the 2011  
Fenceline Area Sol Excavation under TSCA Risk-based Disposal Approval  
Rules of 40 C.F.R § 761.61(c)

Dear Mr. McLerran,

This is a request for a risk-based disposal approval pursuant to 40 CFR 761.61(c). This application has been reviewed and approved by Ecology consistent with the MTCA/TSCA integration policy for Lower Duwamish Waterway source control work.

This project is planned as a joint City/Boeing cleanup effort to remove PCB containing soil on Boeing leased property and adjoining City owned property. The attached work plan describes soil excavation planned for the Boeing leased property. A separate work plan will be submitted by the City for the adjoining Georgetown Steam Plant property. This work is scheduled to be conducted between mid-July through September of this year.

If you have any questions regarding this work, please contact me at 206-898-0438 or at [carl.m.bach@boeing.com](mailto:carl.m.bach@boeing.com).

Sincerely,

Carl Bach  
EHS Remediation Project Manager
